

REMARKS

The courtesy of the Examiner in granting the undersigned attorney a personal interview on November 30, 2005 is gratefully acknowledged. During that interview, the language of Claim 31 was discussed in light of Takeda et al. and Kotsusa references. As noted on the Examiner Interview Summary Record, it was agreed that that the amendment to Claim 31 herein, wherein the pair of grooves are defined as being intersecting, would distinguish the invention over the art of record.

Support for this amendment can be clearly found in Figs. 4 and 5 of the drawings, which clearly illustrate the intersecting groove structure. Also, the specification has been amended to provide clearly support therein for this amendment.

Respectfully submitted,

Richard S. MacMillan  
Reg. No. 30,085
